<sup>1</sup>The Calisto 830 and 835 connect to PC + mobile phone + home landline.  
<sup>2</sup>Wireless microphone available as an accessory for the Calisto 820 and 830.  
<sup>3</sup>Add desk phone connectivity when used with MDA200.  
<sup>4</sup>Wireless frequency: Bluetooth v3.0 + EDR.

**MDA200™**  
 Belonging to our UC Enabler category, the MDA200 headset communication hub allows a corded or wireless USB headset to connect to and switch between calls from both PC and desk phone. (83757-02)

## Technology legend

**A2DP** A Bluetooth® profile that allows high quality audio content to be streamed from one device to another. Listen to streaming media, music and navigation through your headset.

**Adaptive Power** Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximize density.

**Dynamic EQ** Optimises voice quality on calls and automatically adjusts EQ settings when listening to music or for multi-media playback.

**Hi-fi Stereo** Full-range dual channel audio playback capable of frequencies from 20 to over 20,000Hz.

**Smart Sensor™ Technology** Built-in sensors deliver automatic functionality like answering a call by placing the headset on and automatically transferring calls between mobile phone and headset.

**SoundGuard®** Acoustic limiting for protection against sounds above 118 dBA.

**SoundGuard DIGITAL™** All the benefits of SoundGuard, plus anti-startle protection which detects sudden increase in sound and eliminates the increase, and Time Weighted Average (TWA) measurement which prevents average daily sound exposure from exceeding 85 dBA.

**Wideband** Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
